

Environmental Policy Statement

Our factory is fully aware of its impact and its role in the preservation and protection of the social and environmental context in which it performs.

As a result, POPPE-POTTHOFF Scionzier is committed to an environmental approach according to the ISO 14001 certification, we are focusing on:

- Prevention of pollutions
- The respect of regulations and others requirements
- A policy of continuous improvement
- A monitoring of our environmental performance through adequate indicators

We consider the environmental management system to be an essential tool to progress and to optimize our methodologies.

As such, we encourage the involvement of all in this process.

According to our environmental analysis, our improvement axis are:

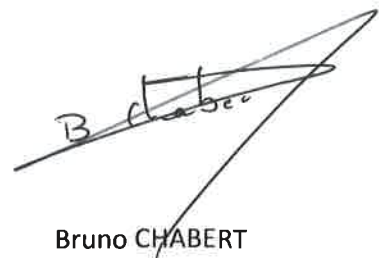

1. Control and waste reduction
2. Liquid pollution prevention
3. The optimization of energy outside the regular opening time
4. Fire Prevention

This policy is a key element of our industrial culture and fits into our approach of sustainable development and citizenship.
